## PROFESSIONAL SUMMARY

---

Computer Engineering diploma student with hands-on experience building AI-driven, full-stack, and real-time applications. Experienced with Python, C++, JavaScript, HTML, CSS, SQL, Git, CrewAI, Streamlit, Node.js, React Native, Socket.IO, and PostgreSQL. Built a multi-agent AI research assistant and a real-time encrypted chat platform. Seeking software development, AI/ML, or full-stack internships.

## EDUCATION

---

**Diploma in Computer Engineering** - Expected 2027

Anjuman-I-Islam's Kalsekar Technical Campus, New Panvel, Navi Mumbai

**Relevant Coursework:** Data Structures & Algorithms, Object-Oriented Programming, DBMS, Machine Learning Fundamentals, Responsive Web Development

## PROFESSIONAL EXPERIENCE

---

**Software Development Intern - Visual Labs** | Mazgaon, Mumbai

- Assisted in building and maintaining web applications with the development team.
- Worked with Python, HTML, CSS, and JavaScript on real-world software development tasks.
- Applied version control, testing, debugging, and collaborative development workflows.
- Implemented and tested functional features against project requirements.

## TECHNICAL SKILLS

---

**Programming:** Python, C++, JavaScript, Java, SQL | **Web:** HTML5, CSS3, Node.js, React Native, TypeScript, REST APIs, Socket.IO

**AI/ML:** CrewAI, Streamlit, OpenRouter API, Machine Learning Fundamentals | **Databases/Tools:** PostgreSQL, MySQL, Git, GitHub, VS Code

**CS:** Data Structures & Algorithms, Object-Oriented Programming, DBMS, Responsive Web Development

## PROJECTS

---

**Aerio - Real-Time Encrypted Chat Platform**

React Native | TypeScript | Node.js | Socket.IO | PostgreSQL | NaCl | GitHub | Live Demo

- Built a real-time messaging platform with authentication, end-to-end encrypted messaging, voice notes, attachments, image sharing, and GIF support.
- Implemented real-time communication using Socket.IO and NaCl-based cryptography.

**AI Research Assistant**

Python | CrewAI | OpenRouter API

- Architected a multi-agent AI system for research, summarization, and fact-checking; generated structured reports through a modular agent pipeline.

**Bank Account Management System**

HTML | CSS | JavaScript

- Developed a responsive banking web application for account creation and transaction handling with client-side validation.

**TuneX Music Player**

HTML | CSS | JavaScript

- Built a responsive browser-based music player with playlist management and JavaScript playback controls.

**Calculator**

HTML | CSS | JavaScript

- Designed a responsive calculator with keyboard-friendly interaction and minimal UI.

**Rock Paper Scissors Game**

JavaScript

- Built an interactive browser game with real-time score tracking and complete game logic.

## ACHIEVEMENTS

---

- Built multiple responsive web applications across frontend, backend, AI, and real-time development.
- Developed AI-powered software projects using CrewAI and LLM APIs.
- Continuously practicing Data Structures & Algorithms and problem solving.

## INTERESTS

---

Artificial Intelligence | Machine Learning | Software Engineering | Full-Stack Development | Web Development | Problem Solving
